

# Midwest Regional Organic Grain and Feedstuffs Report

Agricultural Marketing Service  
Livestock, Poultry, and Grain Market News

June 14, 2023

**Midwest Region States:** Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

## Grain and Feedstuffs Market Trend

Compared to last period: Trade activity very light on light demand. Market uncertainty has growers and buyers struggling to agree on new crop price levels. Very few buyers actively seeking organic grain. Current cash bid prices have farmers holding out for better demand. Spot market activity too thinly traded for an accurate trend. Very few forward contracts are being procured. The next available report will be Wednesday, November 28, 2023.

## Grower FOB Farm Gate Organic Grain

Spot Transactions						Forward Contracts		Cash Bids
Feed Grade	Unit	Price Range	Avg.	Change	Prior Year	Price Range	Delivery Period	Price Range
Yellow Corn	\$/bu	N/A - N/A	N/A	N/A	11.76	9.50 - 9.75	Jun-23 - Sep-23	N/A - N/A

## Midwest Organic Grain and Feedstuffs Bi-Weekly Report

Agricultural Marketing Service

Livestock, Poultry, and Grain Market News

June 14, 2023

### Current Midwest Drought Summary (June 6, 2023)

Localized heavier rains (exceeding 2 inches in spots) fell across the western reaches of the Midwest region, though large swaths of drier-than-normal weather occurred here. Farther east, in Kentucky and the Great Lakes states, mostly or completely dry weather occurred this week, which led to mounting short-term precipitation deficits and worsening streamflows and soil moisture values. Unusually warm temperatures, reaching or exceeding 9 degrees above normal in large portions of Michigan, Wisconsin and Minnesota, also contributed to worsening dryness. Large-scale additions and expansions of abnormal dryness and moderate drought occurred, especially along and east of the Mississippi River and in central Minnesota, where the combination of precipitation deficits, low streamflow and declining soil moisture was most prevalent. Due to similar conditions along the Missouri River in western Iowa, some expansions were made to severe drought there.
